Liebe Kunde, lieber Kunde,

Wir danken Ihnen für Ihre Bestellung! Ihr Einkauf bei uns ist ein Schritt zu einem neuen Lebensgefühl. Ob Sie ein aus Naturholz gefertigtes Möbelstück gekauft haben, eine Hochglanzfront oder eine matte Kunststofffront – jedes Möbelstück hat seine ganz speziellen Eigenschaften. Auch Holzbeschaffenheit und -struktur, wie zum Beispiel kleinere Äste bei Naturholzmodellen, sind Teil der individuellen Ausstrahlung jedes einzelnen Möbelstücks.

Da Möbel aus Naturholz ständigen Klima- und Feuchtigkeitsschwankungen ausgesetzt sind, können vereinzelt Veränderungen in der Oberfläche auftreten, wie z.B. Haarrisse oder Farbveränderungen. Generell nimmt im Laufe der Zeit die Helligkeit an und der Holzton dunkelt nach. Zu einem Natur-Rohstoff wie Holz ein normaler Prozess.

Dieses Buchlein soll Ihnen ein paar Tipps zur Pflege Ihres Möbelstücks geben, damit Sie lange Freude daran haben können.

Grundätzlich gilt:

Möbeln sind teils Gegenstände auf die wir einen besonderen Wert legen und stellen.

- Verschrütete Flüssigkeiten sofort aufwischen;
- In regelmäßigen Abständen den festen Sitz von Schrauben und Beschlägen kontrollieren;
- Der typische, aromatische Holzgeruch von Naturholzmöbeln immer ein Zeichen für die Qualität sein lassen;
- Helle Stellen an den Ästen entstehen durch einen natürlichen Harzausritt und können mit einem trockenen, fusselfreien Tuch abpoliert werden.
- Auch von anderen Holz-, Lack-, Leder- oder Polstermaterialien ist ein schwacher Eigengeruch am Anfang unvermeidbar. Diese Gerüche verschwinden mit der Zeit von allein. Wo Sie sich nicht helfen wollen, können Sie in der Anfangszeit häufiger und/oder wischen Sie die Möbel leicht feucht mit Wasser aus, das mit ein wenig Essig versetzt ist.
- Bewahren Sie diese Hinweise gut auf.

Pflegehinweise für Möbel aus Plattenwerkstoffen

Verwenden Sie zur Pflege Ihres Möbels aus Plattenwerkstoffen am besten ein ein Leinwand, Wischen Sie die Oberflächen leicht feucht ab.

Grundätzlich gilt:

- Verwenden Sie bitte ausschließlich Reinigungsmittel;
- Mikrofasertücher oder Schmutzradierer. Diese enthalten häufig feine Schleifpartikel, die zu einem Zerknätzen der Oberfläche führen können;
- scharfe chemische Substanzen wie Scheuermittel, Bleichmittel, diese können die Oberflächen ebenfalls beschädigen;
- **Scheuerpulver, Stahlwolle** oder **Topfkratzer**. Sie zerstören die Oberfläche so stark, dass eine Aufarbeitung nicht mehr möglich ist;
- **Staubsauger, Bürsten** und **Wasserdrucker**. Durch den hohen Druck und die Hitze, mit denen der Wasserdampf auf die Oberflächen trifft, können diese beschädigt werden oder sich sogar vom Untergrund ablösen.

Beste klant,

Hartelijk dank voor uw bestelling! Het maakt niet uit of u een meubelstuk heeft besteld of een paneel hebt gekocht – elk meubelstuk heeft bijzondere eigenschappen. Ook de staat en structuur van het hout zoals kleinere takken bij natuurhouten meubelen maken deel uit van de individuele look van elk afzonderlijk meubelstuk. Omdat meubelen van natuurhout zijn vervaardigd kan permanente klimaatveranderingen tot kleine veranderingen er af en toe wijzigingen opleveren, de bovenalig zoals haarscheutjes of kleurveranderingen. In het algemeen neemt na verloop van tijd de helderheid af en de kleurverandering toe – het hout wordt donkerder.

De genoemde wijzigingen vormen bij een natuurlijke grondstof zoals hout een normaal proces. Dit boekje moet u een paar tips geven hoe u met deze veranderingen om kunt gaan zodat u er lange tijd plezier aan kunt beleven.

In principe geldt:

- Plaats geen hete voorwerpen op de meubelen.
- Plaats geen kaarsen direct op de meubelen.
- Veed gemorstte vloeistoffen direct af. Controleer met regelmatige intervallen de beslag houten van schroeven en de fysieke, aromatische houdeur is steeds een kwaliteitsbewijs bij natuurhouten meubelen.
- Houdere plaatsen aan de takken ontstaan door een natuurlijk uitdrennen van hars en kunnen worden weggepoijst met een droge, pluisgeevrije doek.
- Ook van andere houten, gelakte, lederen of gepolijste materialen kan een zwakke eigen reuk bij het begin niet te vermijden. Deze geuren verdwijnen na enige tijd vanzelf. Als u wilt dat het sneller gaat, verlucht u in het begin vaker en/of veeg de meubelen lichtjes vochtig af met water, dat een beetje is aangelengd met azijn.
- Bewaar deze instructies goed.

Onderwijsinstructies voor meubelen

Gebruik voor de reiniging van uw meubel paneelmateriaal het best een zachte, niet pluizige doek of een leren doek. Veeg de oppervlaken lichtvat vochtig af.

In principe geldt: Gebruik **zeker niet** volgende reinigings- en poetsmiddelen:

- **microvezeldoeken** of **vuilgommen**. Deze bevatten vaak fijne silpdeeltjes die kunnen leiden tot krassen op de oppervlaken;
- **scherpe chemische substanties** zoals **schuurpoeder, staalwol** of **pannenspontzen**. Deze kunnen de oppervlaken eveneens beschadigen;
- **schuurpoeder, staalwol** of **pannenspontzen**. Ze vernietten het oppervlak zo erg dat een reparatie niet meer mogelijk is;
- **stofzuiger**. Mondstukken en borstels kunnen krassen op de oppervlaken veroorzaken;
- **stoomreiniger**. Door de hoge druk en de hitte, waarmee de stoom op de bovenlagen komt, kunnen deze worden beschadigd of zelfs loskomen van de ondergrond.

De productontwikkelingsafdeling

Dear customer,

Thank you for your order! No matter if you bought a piece of furniture made from natural wood, a high-gloss front or a plastic front – every piece of furniture has unique characteristics. Even the texture and structure of wood, such as small knots in natural wood furniture, are part of the individual charisma of each piece of furniture. Since natural wood furniture are permanently exposed to climate and humidity fluctuations, changes to the surface may occur (e.g. hair cracks or changes in colour) in some cases. In general, brightness decreases and colour saturation increases in the course of time – the wood darkens.

The changes mentioned above are normal for natural raw materials such as wood. This booklet provides some care tips for your piece of furniture so that you can enjoy it for a long time.

The following applies in general:

- Don't place any hot objects on the furniture.
- Don't place candles directly on the furniture.
- Immediately wipe off any spilled liquids.
- Regularly check if the screws and fittings are tight.
- The typical, aromatic wooden odour is always a proof of quality for natural wood furniture.
- The natural emission of resin may produce bright spots on the knots which can be polished with a dry, lintfree cloth.
- Initially, a slight intrinsic odour is unavoidable for other wooden, paint, leather or upholstery materials too. These odours automatically disappear after a while. If you want to speed up this process, ventilate more often at the beginning and/or wipe out the furniture with a slightly damp cloth which was soaked in water mixed with a small amount of vinegar.
- Keep these notes in a safe place.

Care notes for furniture made of panel materials

We recommend using a soft, lint-free cloth or a shammy for conditioning your piece of furniture made of panel materials. Wipe off the surfaces with a slightly damp cloth or shammy.

The following applies in general:

Please don't use the following detergents or cleaning agents at all:

- **microfibre cloths** or **dirt erasers**. They often contain fine abrasive particles which can cause scratches on the surfaces;
- **aggressive chemical substances** as well as **abrasive cleaning agents** or **solvents**. They may damage the surfaces too;
- **scouring powder, steel wool** or **scouring pads**. They destroy the surface so badly that reconditioning is impossible;
- **vacuum cleaners**. The nozzles and steam cleaners can cause scratches on the surfaces;
- **brush cleaners**. The surfaces may be damaged or separated from the ground due to the high pressure and heat of the water vapour.

Since natural wood furniture are permanently exposed to climate and humidity fluctuations, changes to the surface may occur (e.g. hair cracks or changes in colour) in some cases. In general, brightness decreases and colour saturation increases in the course of time – the wood darkens.

The changes mentioned above are normal for natural raw materials such as wood. This booklet provides some care tips for your piece of furniture so that you can enjoy it for a long time.

The following applies in general:

- Don't place any hot objects on the furniture.
- Don't place candles directly on the furniture.
- Immediately wipe off any spilled liquids.
- Regularly check if the screws and fittings are tight.
- The typical, aromatic wooden odour is always a proof of quality for natural wood furniture.
- The natural emission of resin may produce bright spots on the knots which can be polished with a dry, lintfree cloth.
- Initially, a slight intrinsic odour is unavoidable for other wooden, paint, leather or upholstery materials too. These odours automatically disappear after a while. If you want to speed up this process, ventilate more often at the beginning and/or wipe out the furniture with a slightly damp cloth which was soaked in water mixed with a small amount of vinegar.
- Keep these notes in a safe place.

- **microfibre cloths** or **dirt erasers**. They often contain fine abrasive particles which can cause scratches on the surfaces;
- **aggressive chemical substances** as well as **abrasive cleaning agents** or **solvents**. They may damage the surfaces too;
- **scouring powder, steel wool** or **scouring pads**. They destroy the surface so badly that reconditioning is impossible;
- **vacuum cleaners**. The nozzles and steam cleaners can cause scratches on the surfaces;
- **brush cleaners**. The surfaces may be damaged or separated from the ground due to the high pressure and heat of the water vapour.

Уважаемый покупатель!
Благодарим вас за сделанный заказ! Что бы вы ни приобрели – мебелью из натурального дерева, глянцевую или матовую панель из пластика – у каждой вещи есть свои, особенные свойства. Свойства и структура древесины, например, зависят от породы дерева, а также от условий его выращивания. Каждая деталь индивидуальна, поэтому оформление каждого предмета мебели.
Поскольку мебель из натурального дерева подвергается постоянным изменениям климата и уровня влажности, ее поверхность со временем местами может измениться: могут появиться тонкие трещины, может измениться цвет. Обычно дерево постепенно темнеет.
Эти изменения являются обычным явлением, когда речь идет о натуральном дереве.
В этой брошюре приведено несколько советов относительно ухода за вашей мебелью, чтобы она прослужила вам как можно дольше.

Основные правила:
Не ставьте на мебель горячие предметы.
Не ставьте непосредственно на мебель горящие свечи.
Пролитую жидкость вытирайте сразу же.
Регулярно проверяйте прочность посадок винтов и болтов.
Обратите внимание, что запах дерева всегда является признаком качества мебели из натурального дерева. Там, где раньше были insecta, появляются светлые места из-за естественного выхода смолы. Их можно отполировать с помощью сухой ткани без ворса.
От компонентов мебели, изготовленных из дерева и кожи, покрытие лаком, поначало также неимущемо будет исподить запах. Эти запахи исчезнут сами через некоторое время. Если вы хотите поскорее избавиться от них, чаще проветривайте помещение и протирайте мебель тряпкой, чуть смоченной водой с небольшим количеством уксуса. Сохраните эти указания.

Указания по уходу за мебелью из ДСП и ДВП
Для ухода за мебелью из ДСП и ДВП используйте мягкую ткань без ворса или замшу. Протирайте поверхности слегка смоченной тканью.
Основные правила: Покупая мебель, и в коем случае не используйте следующие чистящие средства:
микрофиберные салфетки или патчовые салфетки. Зачастую они содержат мелкие частицы абразивного вещества, которые могут повредить поверхность;
остро действующие химикаты и чистящие средства с абразивным эффектом. Они также могут повредить поверхность;
чистящий порошок, стальной пылесос или скребок. Они разрушают поверхность настолько, что она уже не подлежит восстановлению;
пылесос. Сопло и щетина могут поцарапать поверхность;
пароочиститель. Пар, попадающий на поверхность под высоким давлением и с высокой температурой, может повредить ее и даже вызвать расслоение древесины.

Și în cazul altor materiale din lemn, piele, lăcuite sau tapitate persistă în mod inevitabil la început un miros propriu usor. Aceste mirosuri dispar în timp de la sine. Dacă doriți să contribuiți la acest lucru, aerisiți mai des la început și/sau ștergeți mobila cu puțină apă și oțet.

Ne tegyen forró tárgyat a bútorra.
Ne tegyen gyertyát közvetlenül a bútorra.
A kifolyt folyadékot azonnal törölje le.
Rendszeres időközönként ellenőrizze a csavarok feszességét és az alátételeket.
A természetes fából készült bútorok aromája a illata a minőség jele.
A göcsőknél található véleleges foltokat a természetes gyantalevesekkel kezelje, amit egy száraz, szőszmentes ronggyal törölhet le és polírozhat.
A fa-, a lakk-, és a kárpitanyagok a kezeltben gyengén illatanyagokat bocsátanak ki. Ezen illatanyagok kibocsátása egy idő után magától megszűnik. Ha ezt szeretne felgyorsítani, akkor a bútor használatának elején szellőztessen gyakrabban és/ vagy törölje le a bútor egy keves vizel, amibe egy kicsi ecetet is rak.
Örizz meg az útmutatót, hogy azt későbbis használna hessa referenciaként.

Ápolási tanácsok bútorlapból készült bútorokhoz
A bútorlapból készült bútorokhoz a legjobb ha puha, nem rozosodó rongyot vagy bőrkendőt használ. Törölje le a felületet kissé nedves ronggyal.
Általános utasítások: Semmilyen körülmények között se használja a következő tisztítószereket:
mikroszálas kendő vagy szennytörölőradír. Ezek gyakran apró csiszolószemcséket tartalmaznak, amelyek a felületet ószezkarcolhatnak;
erős vegyszerek, pl. súrolószeret tartalmazó tisztítószerek vagy oldószerek. Ezek ugyanúgy tönkre teheti felületet;
súrolópor, fémszálas dörzsálvány vagy edény súrolószer. Ezek annyira tönkre teszik a felületet, hogy annak javítása nem lehetséges;
porzsó. A cső és a kefék a felületet ószezkarcolhatják;
gőztisztító. A magas nyomás és a hő miatt a gőz a felületen keresztül behatolhat az anyagba, ami sérüléseket okoz, sőt akár a felület le is válhat.

(FR) Cher client, En tant que fabricant de meubles, nous souhaitons attirer votre attention sur le fait que la meilleure des fixations n'est rien sans la qualité du raccord entre le matériel de fixation (cheville) et la maçonnerie. Par conséquent, pensez à vérifier la maçonnerie avant d'accrocher les éléments hauts et utilisez uniquement les chevilles prévues à cet effet. Finalement, c'est la personne qui réalise l'installation qui est responsable de l'attachement à la maçonnerie. La pose et le montage doivent être effectués conformément aux normes et prescriptions de chaque lampe. Si le wattage max. n'est pas respecté, il existe un risque d'incendie dû à la surchauffe. Il est interdit de recouvrir la lampe, en raison du risque d'incendie ! Il faut ressembler toutes les vis et les éléments de montage après 5 à 6 semaines, pour assurer une stabilité durable ! N'employez en aucun cas des nettoyeurs abrasifs ! Si les instructions de service, de commande ou de montage ne sont pas respectées, si des modifications sont apportées aux produits ou bien encore si des pièces sont remplacées ou consommables utilisés qui ne correspondent pas aux pièces d'origine, toutes garanties ou assurances autres auront garanti et nous déclinons toute responsabilité dans ces cas.
Ihre Produktentwicklung Wir wünschen Ihnen noch viel Freude mit Ihrem neuen Möbel.	(FR) Your product development team We wish you plenty of enjoyment with your new furniture.
